

48/2491 Dad Photo Magnet Craft Kit

1. Place a thin layer of glue over the top of the 5 yellow stars and the 1 purple planet ring. Cut a small hole in the bag of glitter and shake a light layer over the glue. Allow to dry for a few minutes and then shake the excess off over a piece of paper so that the glitter can be used again.
2. Glue the dark blue frame to the top of the light blue frame. Glue the light blue "Dad" letters and the light blue cloud with print to the top of the frame.
3. Glue 3 blue rocket pieces to the top of the red rocket. Glue the rocket to the frame and then glue 3 orange rays below the rocket as shown.
4. Glue the planet ring to the top of the purple planet and then glue the purple planet to the frame. Glue 1 orange planet, 1 red planet and the 5 yellow stars to the frame.
5. Be sure to test for the magnetic side of the magnet and then glue the magnet to the back of the frame. Tape or glue your photo to the back of the frame.
