

48/5485 Wooden Beaded Snowman Necklace Craft Kit

1. Thread the cording through the silver loop at the top of the wooden snowman and position the snowman so that it is in middle of the cording.
2. Thread the following beads onto one cording end: one red bead, one snowflake, one green bead, one white bead, one jingle bell. Repeat the order of beads on the other side using the other cording end.
3. Tie the ends of the cording together in the length of your choice to make the necklace. Add a drop of glue to the knot to secure.
